LOLA MONTES .- Bayard Taylor, in going up the Rhine the other day, encountered, as he supposes, " the notori ous Lola," whom he thus describes in his letter to the Tribune :-

"We took the cars to Bonu, and nex The river was swollen by the recent rains, but luckily we had a bright and beautiful day -- It was the same lain Rhine I had kept in my memory, not so dear, nor in my eyes us grand as our Hudson but still a noble river and worthy of its fame. Among our passengers was a tall woman of about thirty years of age, who seemed to have no companion. Her face was still beautiful and her air was singularly bold, brilliant and spirited. It was whispered amoning the passengers that she was no tess than Lola Montes. Her resemblance to the portraits of the latter struck me at the first glance. She was dressed plainly, but with exquisite taste, and notwithstanding a certain defiance in her manner, seemed rather to shrink from than court observation .-- Her eyes were large and a dark brown, her nose faultless in its pure straight outline, and her lips small and finely curved. We at once accepted the suspicion, and set her down for Lola Montes. If she it was, I can easily understand how she could bewilder the brain of an old king, but cannot belive she will ever take cay tive one loyal heart."

COD LIVER OIL.

THE great value of this article as a renealy for Consumption. Scrofida, Chronic Rheomatism Emaciation and all diseases of the longs, has been by actual experience placed beyond a doubt, and there are those in our community who owe to it a restoration to health, when relief seemed hopeless. In the hands of the experienced Physician no medicine has been so universally successful, while the New York and Philadelphia beautief seemed to report yer strongly in favor of

cessful, while the New York and Philadelphia hospitals rectarly report cure stongly in favor of its universal adaption by the profession. We offer the public the preparations of RUSHITON CLARK & CO, N. Y., JOSTPH BUHNETT, Boston.

and operations performed in the art of Dentistry spon them.

As a Surgeon Octalist, in the varieties of diseases either chrostes, indomenatories or accidentals, which effect to Eyes and the Sight, either in young subjects or other ones: the Doctor during his late subsern in the city of Paris, has by deep scientific and laborious studies, rendered himself endocatly acquainted with them, principally with those concerning the operations performed on STRABICS SUBJECTS, or Equitative delicate appearation which gives immediate relief to an awkward and disagreeable deformi-

Squiat Eyed.

This delicute operation which gives imagediate relief to an awkward and disagreeable deformity of nature, performed by a skillid operator, is reduced to a shout 30 seconds, or, to the fartlest, to one minute's anxiety; and, no other hust or sensation than the feeling of a mite of analy, entering under the Eyelids, or the prick of a fac sambrie lines needle, latroduced in the feeling an evidence, the only sight or inspection of the instruments used in performing the operation, will be all sufficient to induce a Strabic, without any heightfout to deairs the immediate performance of the operation.

It is necessary here to state, that in 1841, the Dector was the First practitioner who instruded and performed the operation of strabics subjects, with an indisputable success, after having operated upon upwards of 500 in France, having operated upon upwards of 500 in France, june 23.
